

Peninsula Custom Homes

INTEGRITY AND CRAFTSMANSHIP

Started in 1978 as a speculative luxury home-building company, Peninsula Custom Homes (PCH) has grown into one of the finest custom builders and remodelers in Northern California.

Their projects have contributed to their growing reputation as builders of great quality and unsurpassed integrity, and as their reputation has grown, so has the scope of their projects. PCH has concentrated on high-end renovation projects and custom homes. They have established a well-deserved reputation in their field and have an impressive list of completed jobs and satisfied clients.

President Bryan Murphy started work at PCH in September of 1993 as a carpenter and quickly became one of the company's most valuable employees. After two years in the field, Bryan moved into the main office as an estimator and developed PCH's estimating system. He then worked as a project manager and remodeled a home in Atherton and renovated a historical estate in Atherton. Bryan became the PCH president in 2007 and in 2014 he acquired 100% ownership of the company.

The tangible proof of the success of the company can be found in Atherton, Woodside, Hillsborough, and San Francisco, as well as Lake Tahoe, and Pebble Beach.
