

Daedalus Structural Engineering, located in the heart of Silicon Valley, works with great architects in the Bay Area and beyond, focusing on projects ranging from custom residential design up to 12-story mass timber towers.

At Daedalus we strive to integrate the structure with the overall architectural intent. We look for opportunities to challenge conventional thinking and traditional ways of engineering in search of more inspired design solutions.

We are in search of an experienced Structural Designer/Engineer to join our team. Our ideal candidate has 5+ years of relevant experience, has a growth mindset personally and professionally, is knowledgeable in designing and detailing in all materials, and has mass timber construction experience. AutoCAD and/or Revit experience is strongly recommended. A California P.E. license is required. Strong organizational skills, excellent written and verbal communication skills are a must. If you would like to learn more about how you might contribute to our team we'd love to hear from you.

- 5+ years relevant experience
- Knowledge in all building materials, including mass timber
- Strong organizational, written and verbal communication skills
- Personal and professional growth mindset
- California P.E. license required
- AutoCAD and/or Revit experience strongly recommended

Daedalus is an equal opportunity employer. In addition to a highly competitive salary and a full benefits package, other perks include an additional week off during the holidays, a profit sharing plan, a full benefits package, flex time, and the option to work remotely.
