

Structural Designer (3-5 years experience)

Daedalus is located in the Bay Area and partners with top-tier architects on projects ranging from high-end custom residences to 12-story mass timber towers, destination wineries and unique structures. Project locations range from northern to southern California and Napa Valley to Idaho, Utah, Wyoming and Hawaii. We strive to integrate a building's structure with the overall architectural intent and constantly look for opportunities to challenge conventional thinking and traditional ways of engineering in search of more inspired design solutions.

We are actively looking for a Structural Designer to join our team.

Our ideal candidate is a Professional Engineer with 3-5 years experience, is familiar with all building materials including mass timber, has a growth mindset personally and professionally, is inquisitive, and likes to think outside the box. AutoCAD and/or Revit knowledge is strongly recommended. Strong organizational skills as well as excellent written and verbal communication skills are a must.

Daedalus is an equal opportunity employer. In addition to a highly competitive salary and a full benefits package, other perks include an additional week off during the holidays, a profit sharing plan, a full benefits package, flex time, and the option to work remotely.

**Interested candidates please submit cover letter and resume (PDF format) to
